Arkansas Department of Correction

February 17, 2000

Mr. Bill Knesek
Sweeper Metal Fabricators Corp.
Drawer 672
Drumright, OK 74030

Dear Bill:

The Department of Correction has enjoyed doing business with your company over the past year. Sweeper Metal has delivered quality materials on a timely basis. This can be a critical issue for the Department of Correction when we are trying to build beds with hard to meet deadlines,

Our most recent project at the new SuperMax at Varner, AR, has benefited from your prompt delivery of materials, to specifications, at the job. Your attention to our specific, precise, needs in building prisons has greatly enhanced our success in the Construction Division of the Arkansas Department of Correction.

We commend your company on providing a top quality product and for the personal attention provided by Sweeper Metal when we have questions or additional information to provide.

Sincerely,

A handwritten signature in black ink, appearing to read 'D.W. Cruseturner', written over a horizontal line.

David W. Cruseturner
Assistant Director
Construction/Maintenance Division
